Received and published: 10 January 2014

I have read the manuscript, the comments by the reviewers and the other manuscript closely related to the present one. The manuscript is definitely interesting and I look forward to seeing it published in ESurf. However, some work is needed before publication can be granted. In particular, I agree with the reviewers that the two manuscripts submitted to ESurf are closely related. I do not think the authors should necessarily combine the two contributions, but they should certainly make sure each contribution is totally independent from the other and each manuscript should be self consistent. This will require some changes in the manuscript (see detailed comments from the re-

C517

viewers) and I urge the authors to specifically explain address this issue in their reply.

I look forward to a suitably revised version of the manuscript and to a detailed response to the comments by the reviewers, giovanni coco
