Received and published: 12 February 2014

The first review of Willenbring et al., has been removed from the interactive discussion as it broke several of our reviewers obligations. We ask all our reviewers to follow these obligations and full details can be found under the review tab of the ESurf home page or here: http://www.earth-surface-dynamics.net/review/obligations_for_referees.html

Open review and online discussion is designed to further academic discussion and, importantly, to make the whole reviewing process as transparent and fair as possible –

C19

to therefore work towards removing bad reviewer practice. We behave all our reviewers and commentators to follow the reviewer obligations and to provide constructive feedback.

Tom Coulthard (on behalf of the ESurf editorial team)
