Received and published: 15 July 2015

Dear authors

We have now received four reviews of your manuscript that are very positive and highlight the importance, as well as the quality of your work. They all state also that the manuscript is very well written. There are, however, a few comments and suggestions among the reviews that I would like you to take into account in preparing a revised version of your manuscript (in particular, the sensitivity of the model results to sometimes poorly contained parameters).

I invite you to submit a revised version as soon as possible.
