Interactive comment on “Inter-annual surface evolution of an Antarctic blue-ice moraine using multi-temporal DEMs” by M. J. Westoby et al.

J. K. Hillier (Editor)

j.hillier@lboro.ac.uk

Received and published: 8 February 2016

Dear Dr Westoby and colleagues,

Thank you for your response to the reviewers’ comments. The main criticism was that this might be considered a technical note rather than a full research paper, and you appear to have taken substantial measures to address this point.

Since you have made substantial changes, I envisage getting peer-review of the additional material to see if the requirements for a full research paper are met, but strongly encourage you to submit a revised manuscript.

John Hillier
