Dear Authors, I have now examined the discussion on your paper entitled “Topography-based flow-directional roughness: potential and challenges”. The two reviewers raised some issues about your research. I agree with the fact that the tables could be substituted with a different visualization of the data. I also agree with some critique to the figure style, whereas some images are too small to be understandable (e.g. the fonts in the plots in Fig. 4b and c). You provided a series of replies which give a first overview of the steps you are going to take for the review. If you are willing to pursue these revisions, I will be pleased to reconsider your submission, with the help of the same reviewers who examined the present work. In submitting your revised version, please provide a detailed list of the changes made to the text, and a detailed list of your re-
