

Reply to editor comments on “Headwater sediment dynamics in debris flow catchment: implication of debris supply using high resolution topographic surveys” by A. Loye et al.

Submitted to Earth Surf. Dynam. (2015-48, 2016), Special Issue: Frontiers in geomorphometry.

Response to the last comments before publication

The comment about the title was considered as suggested, as we think to be a very good suggestion.

The reviewer’s efforts were acknowledged as it should be in the chapter dedicated to that at the end of the manuscript.

The correction was made p. 20/L.14 as asked.

Lausanne, June 04, 2016

On behalf of all the authors

Dr. Alexandre Loye
