

## ***Interactive comment on “Modelling a century of soil redistribution processes and carbon delivery from small watersheds using a multi-class sediment transport model” by Florian Wilken et al.***

### **Anonymous Referee #2**

Received and published: 19 November 2016

Dear authors Dear colleagues, I found your paper interesting and as a reviewer I am trying to help. As reader I wish to see your paper with slightly more discussion (now is very technical) and with a shorter conclusion section. My comments (suggestions) are attached. Congratulations for this effort to understand the erosion processes I am sure will be a very successful paper. I give in my comments some examples of papers that can help you but there are others that will be of help too. Sincerely ARtemi Cerdà
