We'd like to thank Marco Cavalli for the error report and the clarifications provided on his Index of connectivity (IC) calculation. It seems that we skipped the normalization of the Roughness Index (RI) explained in Cavalli et al., 2008 ; within the dimensional analysis. The latter citation will be cited in the future version of the manuscript. The use of the Cavalli et al 's index and its interpretation will be modified accordingly.

Sincerely,

Étienne Cossart and Mathieu Fressard
