Received and published: 27 February 2018

Dear Dan, We have now addressed the legitimate problems raised by the reviewers in their thoughtful reviews. Chronologies have always been challenging in river deltas as several rveiews on the topic attest over the years but we are confident that ours are at an appropriate level of quality for our exploratory study of the Ayeyawady delta and would stand and be useful for future detailed studies. We explained and justified our interpretations and modified them in some cases based on the reviews.
