Received and published: 6 May 2018

I thank warmly David Milledge for its in depth lecture and his many thoughtful and constructive comments.

We will re-evaluate the novelty and interest of "comprehensive" inventories and further discuss and nuance some sections of the manuscript to answer these points.

We will also clarify different point of the methods, in terms of inventory mapping, geometry correction or statistic robustness of the landslide slope probability.

We will answer these points and the detail comments exhaustively when receiving the

C1

comments from the other referee.
