Dear referee #1 and Dear editor,

Thank you for the nice comments, and recommendation for publication.

The remark about C-value is true. We are aware that C is difficult to choose. For that reason we will add some comments about volume changes with C-value changes all along the text. .

We will improve the figure 8 by adding the colour scheme and the legend and provide another 3D point of view.

We will enlarge the small fonts in the figures and in some cases we will make the figures larger.
