Received and published: 11 March 2019

Dear authors,

I just discovered this report, which may be relevant for your paper:  
<https://www.ethz.ch/content/dam/ethz/special-interest/baug/vaw/vaw-dam/documents/das-institut/mitteilungen/2010-2019/245.pdf>

The author did experiments with changing sediment supply in a meandering channel (smaller sinuosity than yours), investigating deposition patterns over a flat bed and the subsequently developed armoured bed, which was artificially fixed in some of the experiments. The relevant chapter is chapter 7.

All the best, Jens
