Received and published: 22 April 2020

We thank Georgina Bennett for her interest in the study and the constructive comments she provided. We overall note that her comments (as well as from the other reviewer) require an improved and broader discussion of alternative transport processes and emplacement mechanisms for the studied boulders. We will include these remarks, along with all other, in a revised version of the manuscript once the discussion period closes and depending on the associate editor's suggestions.

Marius Huber, Maarten Lupker & Sean Gallen, on behalf of all co-authors.
