Received and published: 22 April 2020

We would also like to thank the second reviewer for her/his comments. Similarly to the first review, these comments were well received, constructive, and triggered some discussion amongst us. We will incorporate the results of these later in a revised version of the manuscript. This new version will hopefully clarify the discussion about the range of possible transport mechanisms of these boulders but will probably also highlight some of the limitations of our data in answering all the questions that were raised.

Marius Huber, Maarten Lupker & Sean Gallen, on behalf of all co-authors.
