

Interactive comment on “Box canyon erosion along the Canterbury coast (New Zealand): A rapid and episodic process controlled by rainfall intensity and substrate variability” by Aaron Micallef et al.

Anonymous Referee #2

Received and published: 13 July 2020

The paper is interesting but the geophysical approach needs more attention and some more information. Therefore, even if the authors did a nice job, they should rewrite the geophysical part or eliminate it, in order to work more on the data elaboration. Attached is a pdf manuscript with my comments.
