Received and published: 13 March 2020

Dear Editor, regarding 3) Presentation quality: The structure of the paper is good, and the figures are basically good. However, the authors are not native speakers of English, and I am afraid that makes it more difficult for them to express themselves clearly. My evaluation of "good" has a "minus" attached and is due to the large number of comments required during the review. The rating should hopefully switch to a full "good" once the manuscript is revised.

A word to e-surf: Please require a minimum font size of 11 point for submitted manuscripts and please encourage authors to place figures directly into the text where
