I like to thank all reviewers for their constructive comments on the manuscript by de Haas et al, and I am looking forward to a final response by the authors. In addition, I noticed that the authors referenced own work that is currently in review (De Haas, T., Nijland, W., De Jong, S., M., McArdell, B. W.: How memory effects, check dams, and channel geometry control erosion and deposition by debris flows. *Scientific Reports*, In Review). Could the authors please supply a link to the paper if now published or consider posting a pre-print?
