Received and published: 19 May 2020

Dear reviewers, Dear editor,

thank you for your highly valuable comments. We posted point-by-point responses to your comments and uploaded the revised manuscript (one version with markups showing revisions, the other with a clean layout).

Following the comments by Arjun Heimsath (RC2) and comments made by referees of the companion paper (esurf-2020-8) the sensitivity analysis was extended and a boot-
strapping exercise included. Günther Prasicek carried out the bootstrapping simulation and was added as co-author.

Kind regards

Ingo Hartmeyer (on behalf of all co-authors)
