

Dear Sagy, dear Copernicus team,

thank you very much for your positive response! I did not find many grammatic issues, and the only native speaker in our institute would probably go mad if he was asked to read all papers of all groups completely. Anyway, my experience with the copy-editing team has been very good, so that they will surely find the lingering issues.

As suggested by Polina Shvedko, I changed the folor scheme of Fig. 7 and the respective dots in Figs. 1 and 5. However, the colors are not very relevant in this figure and none of the interpretation relies on the colors. In addition, I replaced red by orange in Figs. 9 and 14 since it seems to be better in monochromatic view.

Best regards,

Stefan
